

LEGENDARY™ BEDKNIVES

At Jacobsen, we are renowned for our quality of cut. In order to help accomplish that, we have a full line of Legendary™ bedknives that help get the height and quality of cut you are looking for time after time.

There are 6 types of bedknives available to meet your specific need:

- **Heavy Section** – .25" thick. Mostly for Tri Kings, older fairways and some current fairway units.
- **Medium Section** – .204" thick. Typically used for smaller fairway applications.
- **High Profile** – .125" thick. For walking and riding greens mowers. "H" is stamped on each bedknife.
- **Low Profile** – .125" thick. For walking and riding greens mowers. "L" is stamped on each bedknife.
- **Tournament** – .125" thick. For walking and riding greens mowers. Provides second lowest height-of-cut. "T" is stamped on each bedknife.
- **Super Tournament** – .125" thick. For walking and riding greens mowers. Provides lowest height-of-cut. Less aggressive for lowest cutting heights. "XX" is stamped on each bedknife.

The Genuine Difference

Genuine Jacobsen Bedknives

- Look for the stamped  (Jacobsen) on the bedknife to ensure it's Genuine!
- Benefit: continue to achieve the best quality-of-cut you expect over the life of your equipment.

Made of alloy or hardened carbon steel.

- Benefit: provides longer wear, more strength.

Patented austempered heat treating process

- This process provides a tougher part with minimum distortion. All bedknives distort during the heat treat process but, by controlling it, there is less stress during straightening.
- Benefit: provides less distortion and tougher part

100% straight

- Closer tolerances between reel and bedknife
- Benefit: gives you a great cut.

100% quality inspection

- Each one is hand inspected after production.
- Benefit: guarantees quality, fit and function.

Height of Cut Selection Chart (Greens Mowers)

For all greens mowers (except the TC22), the height of cut range is 0.082" to 0.438" (2.1mm to 11.1mm) depending on turf conditions and bedknife installed. For the TC22, the height-of-cut range is 0.118" to 0.394" (3.0mm to 10.0mm) depending on turf conditions and bedknife installed.
