SLF1 ELITE

SUPER-LIGHT FIVE REEL LITHIUM MOWER

A programmable and dynamic frequency of clip which reacts to an operator's skill, providing precise reel control.

The INTELeTRAC 3WD System continually monitors traction and adjusts the SLF1 to prevent scuffing, and limits wheel slip or spin even in the most demanding terrain.

As the industry's first all-electric ride-on five unit reel mower, the SLF1 ELITE completely separates itself from other fairway mowers. With no risk of hydraulic or other harmful fluid leaks, the turf remains protected while getting a next-level cut.
